Linear Vibrating Screen

Product overview

Two-layer vibrating screen and stainless steel rotary vibrating screen is the same product, this screen is the latest YZUL series of single flange vibration motor, with a stable exciting force. This sieve can be sieved of various materials with sifting special, high viscosity, fine materials, fine powder, powder, and dry, wet materials and other materials, with high screening efficiency.

Features

1. Small size, light weight, saving space. The direction of the discharge port can be adjusted, coarse, fine material automatically discharged.

2. Screen mesh is not blocked, the powder is not flying, the smallest screen can be up to 500 mesh (28 microns), the smallest filter up to 5 microns.

3. Stainless steel rotary vibration screen with unique grid design, long-term use of screen, easy to change screen mesh, only 3-5 minutes, simple operation, easy to clean.
