High Amplitude Probability Combination Screen

**Principle**

1. Set distributor, to the multi-screen surface distribution of materials, so that feed group thinner, more uniform.
2. Each vibrating unit achieves high amplitude probability sieving.
3. Machine to achieve three-dimensional combination of screening.
4. Equipment configuration is reasonable, anti-blocking screen can be done without blocking the hole.
5. High amplitude, shunt, sub-materials, probability, combination of organic screening is my company developed dry screening technology of innovative products.

**Product Overview**

1. High amplitude probability combination screen is composed of two-way distributor, automatic moving device, special sieve plate, exciter, motor, damping spring, maintenance platform, anti-blocking drop tube and other components.
2. The sieve body does not vibrate, sieve core vibration, vibrating screen of the dynamic load is similar to other screening machine 1/2, energy saving.
3. High amplitude probability combination sieve at the entrance of the material additional shunt, the incoming material is divided into two, flow and thickness reduced by half, the distributor can be realized at the same time to a number of sieve surface uniform splitting, effectively improve the efficiency of the sieve mesh.

**Features**

1. New anti-blocking sieve plate, with strong wear resistance, can maintain a large opening rate, in order to achieve higher screening efficiency.
2. Sieve mesh angle can be adjusted, passing capacity of the material is strengthened, Screening time extended, screening efficiency increased.
3. High amplitude probability combination sieve is composed of many screening units, which can achieve larger screening requirements.
4. High amplitude probability combination sieve whole screen with a closed structure, to avoid dust leakage, more environmentally friendly.

HENAN WINNER VIBRATING EQUIPMENT CO., LTD
High Amplitude Vibrating Screen

Main Specifications

Bidirectional feeder
Upper maintenance platform
Vibration unit
Frame combination
Motor
Mobile screen core device
Ladder
Screen hopper
Striking device

Details Diagrams

HENAN WINNER VIBRATING EQUIPMENT CO., LTD
Enterprise Profile

Since 1954, Winner Group started the factory manufacturing Vibrating Feeder, Jaw Crusher, Impact Crusher, Cone Crusher, Vibrating Screen, Belt Conveyor, Construction Demolition Waste Recycling, Municipal Solid Waste Recycling, Sand & Stone Production Line and so on, with a wide application in Coal industry, Steel, Metallurgy, Mining, Construction, Chemical industry, food industry etc.

Located in Xinxiang city, China, 1 hour by car to the airport, with employee more than 1000, among whom 380 R&D engineers, a provincial research center, owning 133 invention patents and utility patents, ISO and CE criteria, top brand in domestic market and more than 30 countries exporting cases, this is how Winner Group guarantee the product quality and technical services.

With lots of government quality awards and technique awards, Winner serves the customers including China Bao Steel, China National Coal Group, Shenhua Group and Exports to USA, France, Brazil, India and other countries. Winner Group will always be there to provide you customized crushing and sorting solutions.
